Brief Summary and Statement of Need:

This project is for the support of statewide programs. Authority is for the anticipated or unexpected receipt of federal or other funds such as federal emergency projects, federal contingency projects, or safety programs. Special national discretionary funding for highways, ferries or airports may be accepted through this appropriation. These funds are also used when project costs have increased, a revised program is not feasible and immediate additional funding is required to avoid project delays or the loss of federal funds.

If this project is appropriated with allocations, then the amount of requested federal authority will need to be increased by approximately \$56.5 million. Since not every project is able to move to the construction phase, it is necessary to over-budget federal authority in order to complete the additional accounting work necessary to effectively manage a federal transportation program.
